Dr. A. Houben  
President de la republique du Zaire  
Institut National Pour La Conservation  
de la Nature  
Rue Defacqz 1  
B-1050 Bruxelles

Dear Dr. Houben:

This is to acknowledge your letter of August 28, 1974 to our President and Director, Dr. Paul M. Fye. Dr. Fye is away from the Laboratory and will not return until the first of the week. In order to provide a prompt reply, I have assembled the detailed references and the journals in which they have been published. I am including one of the reprints from Dr. Deuser who is on our Staff.

Dr. Degens is now Chairman of the Department of Paleontology, Geologisch-Palaontologisches, Institut der Universitat Hamburg, 2 Hamburg 13, Von-Melle-Park 11, West Germany, and I would suggest you write directly to him.

Our Woods Hole Oceanographic Institution Collected Reprints may be found in the Institut Zoologique Torley-Rousseau, Universite de Bruxelles, Avenue des Nations, Bruxelles. Unfortunately, 1973 Collected Reprints will not be distributed before early next year. The Institution does not keep reprints available other than from the author or through Collected Reprints.

Enclosed is a list of reprints which you may find of interest. I hope this information will be of some assistance to you.

Sincerely,

*Charles S. Innis, Jr.*

Charles S. Innis, Jr.  
Executive Assistant to the Directorate
